BACKGROUND

ABOUT

DevOps, Automation & FullStack expert with 8+ years professional experience. I buuild high performance, scalable applications that are fun to work on and easy to deploy.

WORK EXPERIENCE

DevOps Engineer, TigerText (https://tigertext.com)
May, 2015 - Present 🕐 7 months

- On-Call engineer for messaging systems used by large enterprises and healthcare providers
- Managed large Chef code base and complex technical environment
- Built new CI/CD platform for development teams
- Monitoring, performance and security auditing

DevOps Engineer, Rackspace (https://rackspace.com)
May, 2013 - Apr, 2015 🕐 1 year 10 months

- Built, managed and supported multiple high profile client's production environments simultaneously
- Developed scalable and reusable automation solutions using Chef with a team of engineers
- Implemented zero-downtime deployments for web-scale applications in various languages within PHP/LAMP, Node.js/MEAN, Java/Tomcat, Rails, Django and Wordpress ecosystems
- Built resilient, redundant and scalable systems using pure cloud, pure dedicated, and hybrid environments using Chef, SaltStack and Ansible
- Point of technical contact for large & well known organizations including large national retailers, movie studios and web startups
- Built applications from scratch against undocumented internal APIs to help boost productivity and team efficiency

SysAdmin/Web developer, Techtonic Games (https://rackspace.com)
Apr, 2011 - Oct, 2012 🕐 1 year 6 months

- Assesed and improved existing infrastructure (monitoring, statistics, security, phone system)
- Built many webpages from artist designs (from photoshop to the web)
- Managed many hosted services such as game CDN, leaderboards, etc

Ruby on Rails / Javascript Developer, The Okori Group (http://theokorigroup.com/)
Apr, 2011 - Mar, 2012 🕐 11 months

- Implemented features & bug fixes to mission critical applications
- Designed, created and implemented customer communications portal
- Web development from whiteboard to production for GetCocoon.com flagship product

Linux Systems Administrator, Impulse Internet Services (http://impulse.net/)
Apr, 2007 - Dec, 2009 🕐 2 years 8 months

- Developed and implemented a number of internal applications, including network and systems monitoring, call center visualizations, and tech-support knowledgebase
- Responsible for mission-critical systems uptime, including 20,000+ user email system

SKILLS

Operations

AWS Linux CI/CD Networking On-Call

Programming

Javascript   Ruby   BASH   Python

Automation

Docker   Chef   Ansible   Salt   Jenkins

Development

ES6   Node   React   WebGL   HTML/CSS
